

EverWear Trail Running Shoes - User Manual

Document date: 2025-01-16

Sizing

The EverWear Trail Running Shoes follows EverWear standard sizing. Refer to the size chart at marketsphere.example/sizing for measurements.

General guidance:

- Base layers should fit snugly without restricting movement
- Outerwear should allow room for layers underneath
- Footwear should leave 1/2 inch in front of the longest toe
- If between sizes, size up for layering pieces and size down for base layers

Material and Construction

Materials vary by product:

- Merino wool: temperature-regulating, naturally odor-resistant, dries quickly
- Synthetic insulation: maintains warmth when wet, fast-drying
- Down insulation: highest warmth-to-weight, less effective when wet (look for water-resistant down)
- Membrane fabrics: waterproof, varying breathability ratings

All products are tested for performance to the standards listed on the product page.

Care Instructions

****Follow the care label first.**** General principles:

****Merino wool****: Machine wash cold on gentle cycle with wool-safe detergent. Lay flat to dry. Do not bleach or iron.

****Synthetic fabrics****: Machine wash warm; tumble dry low. Wash with similar fabrics; avoid washing with cotton (lint).

****Waterproof outerwear****: Wash with technical wash (e.g., Nikwax Tech Wash). Periodically re-treat with DWR (durable water repellent) to maintain water resistance. Do not use fabric softener.

****Down****: Use down-specific detergent. Tumble dry low with clean tennis balls to redistribute down. May require several drying cycles to fully dry.

****Footwear****: Brush off dirt after each use. Air-dry naturally; do not heat-dry. Use protective sprays for waterproofing as needed.

Fit Adjustment

Many EverWear products have adjustable features:

- ****Drawcord hems****: Adjust at hood and waist to seal out weather
- ****Cuff adjustments****: Velcro or elastic cuffs at sleeves and ankles
- ****Snap-back or removable hoods****: Remove for warm weather, attach for storms

Adjustments should be snug enough to maintain function but not restrict movement or blood flow.

Layering Guide

EverWear pieces are designed to layer. A typical 3-layer system:

1. **Base layer** (next-to-skin): wicks moisture. Examples: Merino base layer, synthetic underwear.
2. **Mid layer** (insulating): traps body heat. Examples: fleece, down jacket, insulated vest.
3. **Outer layer** (shell): blocks wind and water. Examples: rain jacket, hardshell.

Add or remove layers based on activity level and conditions. As you warm up from activity, shed layers to avoid overheating and sweating into your base layer.

Returns and Sizing Issues

If your EverWear item doesn't fit, you have 60 days to return for refund or exchange (consistent with our apparel return policy). Tags must remain attached for return.

Not sure about size? Order both sizes; return the one that doesn't fit. No restocking fee on apparel sizing exchanges.

Warranty

EverWear apparel is warranted against manufacturing defects for 1 year. Defects include:

- Seam failures within normal use
- Zipper failures (sliders, teeth) within normal use
- Membrane delamination

Not covered:

- Wear and tear in high-friction areas
- Damage from improper care (e.g., washing waterproof items with fabric softener)
- Damage from impact or sharp objects
- Footwear sole wear (limited to 6 months)

File claims at marketsphere.example/warranty.

Sustainability

EverWear committed to reducing apparel's environmental impact:

- Bluesign-approved materials where available
- Recycled polyester in synthetic insulation
- Responsible Down Standard certified down
- PFC-free DWR (durable water repellent)
